PROFESSIONAL SUMMARY

Self-taught, product-minded full stack Software Developer. I like taking a feature from start to finish: understanding what the client needs, designing it, building it across backend and mobile, testing it and presenting it. I learn fast: in less than a year I went from Odoo to building with Laravel, Flutter and AI on a SaaS for the Norwegian market. I work with tests and code review, and use English every day in an international team.

EXPERIENCE

Software Developer | FleetX (Frakt24) | Orihuela, on-site 01/2026 – Present

- Development of a multi-tenant SaaS TMS (Laravel 10, PHP 8.3, MariaDB, Livewire, JavaScript) and its driver app (Flutter/Dart, Firebase/Firestore).
- **Bulk transport module:** built end to end in the TMS and the app (day planning, loads, sites and tips, approval, pricing and invoice appendix).
- **AI-powered email order intake:** classifies each email (order, quote or other), extracts data from PDF, image, Excel and Word files and creates the order in the TMS, with protection against prompt injection and malicious files.
- **AI agent chatbot:** in-app assistant that only answers questions about the TMS.
- **OCR and document reading:** parser for Statens vegvesen special transport permits that creates the order with its route and bridges, and weighbridge ticket reading in the app with Google ML Kit.
- **Automation:** automatic order creation, nightly approval of workdays, recurring orders and real-time sync between the TMS and the app.
- **AI-assisted development (Claude Code):** set up skills, hooks, subagents and MCP servers (Jira, Chrome DevTools) to implement, run browser QA and review code.
- Legacy PHP to Laravel migration, PHPUnit tests, code review on GitHub (CodeRabbit), CI and ticket-based work in Jira.

IT Support Technician | Mercaluz – EAS Electric | Redován 07/2025 – 08/2025

- User support (hardware, software and network) and maintenance of the company's computers.

Developer (internship) | Damián Montoya – Abogados Asociados | Murcia 03/2025 – 06/2025

- Developed Odoo 18 modules with Python and SQL to customise and automate internal processes.

IT Technician (internship) | Ticarum – University of Murcia | Espinardo 03/2023 – 06/2023

- Maintenance and repair of computers across several faculties, technical support and inventory.

EDUCATION

Higher VET in Multiplatform App Development | IES Las Espeñetas 2023 – 2025

Intermediate VET in Microcomputer Systems and Networks | IES Las Espeñetas 2021 – 2023

PERSONAL PROJECTS

YourFavs | Web app to track films and TV series · yourfavs.netlify.app 05/2025 – Present

- **Real-time chat:** one-to-one and group conversations with Supabase Realtime, private per-user channels and permissions enforced in the database (RLS).
- Astro 5 (SSR), TypeScript, Supabase (PostgreSQL), Netlify Functions and the TMDB API. Import from IMDb and Letterboxd, migration from Firebase to Supabase and 344 database tests (pgTAP).

OnMyMind | Offline-first list app (PWA) 09/2026 – Present

- React 19, TypeScript, TanStack Query, Supabase (Edge Functions on Deno, pg_cron) and Web Push. Real-time shared lists, on-device encryption (AES-GCM, WebAuthn/Face ID), offline change queue and 1,400+ tests (Vitest, pgTAP).

SKILLS AND LANGUAGES

- **Programming:** PHP, Dart, JavaScript, TypeScript, Python, Java, Kotlin, SQL
- **Frameworks:** Laravel, Livewire, Flutter, React, Astro, TanStack, Tailwind CSS, Bootstrap, Odoo
- **Databases:** MySQL, MariaDB, PostgreSQL, Supabase, Firebase/Firestore
- **AI:** LLM integration, chatbots, OCR, Google ML Kit, prompt engineering, AI agents (Claude Code, MCP)
- **Tools:** Git, GitHub, Jira, PHPUnit, Vitest, pgTAP, REST APIs, real time (WebSockets), PWA, Docker and Docker Compose (Colima), Netlify, AWS S3
- **Languages:** Spanish (native); English (professional working proficiency, B2), used daily with Norwegian colleagues and clients
